Continuation of 11. does NOT place the application in condition for allowance because: 101 Utility and 112-1 Enablement issues remain. Assays demonstrating that glucose uptake is inhibited by the PRO polypeptide are not enabling, since there is no real world use for such a peptide, or the assay that measures it. Since there is little additional information about the PRO polypeptide, DNA or claimed PRO antibody, use of the claimed antibody made against the peptide used for the FFA assay cannot be seen as enabling without evidence or data supporting a specific function for the PRO polypeptide, DNA or antibody.
